SUMMARY

A passionate computer science graduate seeking a challenging environment where I can continually grow and learn. I am eager to contribute my problem-solving skills while continuously expanding my knowledge and skill set in a diverse, inclusive, dynamic setting.

EDUCATION

American University of Sharjah (AUS)
Bachelor of Science in Computer Science

Sharjah, UAE
Jan 2023

Al Ghurair Foundation for Education Scholarship
AUS Distinguished Student Scholarship
AUS Academic Accomplishment scholarship

Udacity

Data Analysis and Visualization – Power BI Nanodegree

EXPERIENCE

Teleperformance

Dubai, Al-Sufouh 2

Medical Interpreter

October 2023 – Present

- Utilized communication skills in interpreting verbal communication into the target language.
- Delivered outstanding customer service by utilizing active listening as a key asset.
- Handled confidential customer information with utmost sensitivity.

FreshNow

Dubai, Al Qusais, Damascus St.

Data Analyst Intern

July 2023 – September 2023

- Collaborated within a team of two on 3 projects to analyze FreshNow's sales data using Microsoft Excel, extracting valuable insights through pivot tables, calculations, and functions.
- Conducted data collection, cleaning, formatting, and validation to ensure data accuracy and integrity while creating a reusable dataset for future company reference.
- Designed and developed an interactive dashboard that was later adopted by the company as a model for future analyses.

Schneider Electric (SE)

Dubai, Silicon Oasis & Jebel Ali

Summer Intern

July 2022 – September 2022

- Completed various training courses about cybersecurity fundamentals, sustainability, IoT, 5G Network and more.
- Worked in a group project as a part of an annual competition where I joined the E-commerce team and finally won the competition which secured for all the team members a place in the graduates training program.

PROJECTS

Data Model for A Tea Company

Oct 2023 – Oct 2023

- Created a dynamic data table that auto-updates based on the fact table's start and end dates.
- Built and managed data model relationships to ensure accurate cross-table analysis.
- Applied DAX measures for custom calculations and aggregations in Power BI.

Market Analysis Report for National Clothing Chain

Dec 2023 – Dec 2023

- Applied linear regression to predict future outcomes and support strategic decision-making.
- Performed exploratory data analysis with visualizations like histograms, heat maps, scatter plots, and KPI cards.
- Translated complex data insights into actionable conclusions to support strategic planning and business objectives.

SKILLS & ACTIVITIES

Technical: Java, Python, SQL, R, HTML & CSS, Front End Development Libraries (Bootstrap, JQuery, SASS, React..etc), Data Analysis (Excel, Power BI)

Additional: Meets deadlines and respects punctuality, works well in teams and individually, Polyglot.
